Profile

I hold a master's degree in Design from the National Taiwan University of Science and Technology. I studied programming languages in college including C #, java, javascript. After that, I learned about design thinking and design research methods in the institute. I also chose a variety of interactive design courses, Speculative Design, Design Fiction, and Critical Design. Therefore, I studied the relationship between people and technology and explored the relationship between identity and body through wearable devices. In the future, I will continue to explore Human-Technology, and design attractive expressions.
